It's almost that time of year again **Christmas & New Year is on its way!**

Enclosed you will find your complementary new year's present, the Superlux 2013 calendar, featuring real pictures of homes with Superlux products throughout.

See the amazing difference good lighting can make creating comfortable and welcoming environments. Also don't forget that Superlux have a great range of energy efficient lighting too. Did you know that you can easily save \$500 on the annual power bill by installing energy efficient lighting? And the pay back to the customer is only 6-18months, after this ongoing and increasing savings are made as the cost of electricity inevitably increases.

In this Issue:

SL strip light range complete with energy saver fluorescent lamps

SD125F - Retrofit and trim option guide

Dusk to Dawn floodlights NOW in Stock!

Easy Savings!

If you install 20 x 15Watt SD125F energy saver fluorescent downlights and they run for 4 hours a day every day for a year, running at 22cents per kilowatt hour the savings are \$546.04 per year and with better light output when compared with a standard 100W incandescent downlight.

Model KPDS
