Things to Know

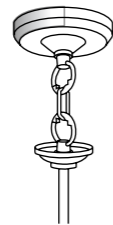

Chain Lengths

Chain pendants have a nominal 450mm length of chain provided along with the appropriate cord length. Only a Registered Electrician should extend chain and cord lengths.

Product Height Measurement

Pendant height measurements stated are only including one chain loop, as this is the shortest possible drop; we have done this as to consider head clearances.

Direct Ceiling Mounting - DCM

Chain pendants marked with DCM icon can be directly ceiling mounted. Just remove the chain and the two bigger chain loops, then directly attach to the ceiling canopy using the 10mm threaded stem components included. This achieves a different look and the absolute shortest length.

Metal Work, Finishes and Glass

Decorative product manufacture utilises a lot of hand craft. Metal framing, glass blowing and hand finishing will vary from batch to batch. Lighting bought for a project should be purchased as one batch to minimise variations. Illustrations, measurements and descriptions are approximate and for guidance only, they are subject to alteration and modification.
