

Track and Display Lighting

Things to Know

Originally designed for Retail display they are easily customised to today's ever changing requirements.

Track Systems Offer Extreme Flexibility

- A choice of head styles.
- A choice of lamp technology.
- The ability to extend track to other areas with straight, corner, tee and cross joiners.
- The ability to reposition, remove or add spot and flood lights.
- Easy installation where power supply is otherwise difficult.
- Very easy to maintain.

Superlux offers two cost effective and reliable single circuit track systems.

The **Model TK** system is available in three colour ranges and incorporates both 12 volt Halogen Spot Lights and mains voltage PAR Flood Lights. The halogen heads have built in transformers allowing use of MR16 LED high power lamps.

The **Model TE** system in Satin Chrome is a slimline mains voltage halogen system. Most of the heads can also use GU10 high power LED lamps.

A specialised high power LED Work Light with a flexible neck is available.

Other adjustable spot systems available are the **Rope Light** system and **Model SA** adjustable fixtures.

The **Model TS** system is a 3 Circuit Commercial Track System, which allows for 3 individually switch circuits on the one track. Halogen, metal halide, fluorescent and LED, High CRI technology light sources are available.
